

# IMPLEMENT'S PROJECT MANAGEMENT PROGRAMME

Some of the primary tasks of a project manager include being able to plan a project, lead a project team, complete a project successfully and participate actively as a project manager.

"Good interaction between theory and practice – I return with a lot of useful tools in the toolbox. Good energy, engagement and high professionalism."

Rigmor Holck Friedrichsen, VKR Holding

Implement's Project Management Programme – IPMA® Registered – will enable you to plan your project, lead your project team, navigate the project and use your competences to ensure the progress, anchoring and impact of the project. In short, Implement's Project Management Programme will help strengthen your project management methods as well as your leadership competences. Thus, you will be well-equipped if you decide on obtaining an IPMA® certification later on.

## Target group

You are a project participant or in the process of becoming a project manager. You may also be an experienced project manager with a wish to incorporate more theory and structure into existing projects and to further strengthen your "toolbox."

## Main content

Implement's Project Management Programme consists of the following four modules and an exam:

- Project Management 1  
– Manage your project
- Project Management 2  
– Lead your project team
- Project Management 3  
– Succeed with your project
- Project Management 4  
– Strengthen your personal leadership in projects
- Exam: Project Excellence®  
– Advanced

The division into four separate modules allows you to complete Implement's Project Management Programme at your own pace. We do, however, recommend a break between the modules. This way, you will get the opportunity to apply some of the theoretical tools in practice and reflect on yourself and your role as project manager.

## Takeaways

After the course, you will be able to:

- Create an overview of your project and plan it in a nuanced manner
- Establish, motivate and lead your project team as well as create engagement
- Complete your project successfully in an unpredictable world with focus on benefits realisation
- Contribute actively and strengthen yourself in the role as project manager

To get a more detailed overview, we recommend that you read the course descriptions.

## The course price includes

### Before the course:

Preparation assignments

### During the course:

Catering and course materials. These are further described in each course description and include a notebook with stickers (stickers with tools and key points), books, laminated overview of tools, tests, suggested action and reflection assignments, a collection of articles and feedback.

### After the course:

Course certificate and photos of flipovers from the course.

After completing “Project Management 1 – Manage your project”, you will get access to Implement’s eight e-learning modules and tests. This is an excellent opportunity to test your knowledge.

After the exam “Project Excellence® – Advanced”, you will receive an exam certificate (provided that you pass the exam) documenting that you have completed Implement’s Project Management Programme.

## Implement’s Project Management Programme, part 1, which includes:

- Project Management 1
  - Manage your project
- Project Management 2
  - Lead your project team
- Exam: Project Excellence®
  - Fundamentals

## Implement’s Project Management Programme, part 2, which includes:

- Project Management 3
  - Succeed with your project
- Project Management 4
  - Strengthen your personal leadership in projects
- Exam: Project Excellence®
  - Advanced

## Networking and exchange of experience

The course participants come from a number of different companies and industries. We try to utilise this to ensure that different points of view, experience and perspectives are brought into play. The various practical exercises and discussions will give you the opportunity to strengthen your network.

Both courses and exams can be purchased separately. You may also choose to purchase Implement’s Project Management Programme as two separate parts:
