

# PROJECT MANAGEMENT 2 – LEAD YOUR PROJECT TEAM

- Facilitation is about utilising the project participants' knowledge, experience and opinions in a process that is both well thought out and well managed.
- As a project manager, you must be able to do this.

The course focuses on making you stronger in your role as facilitator and manager of the project team. You will be introduced to a series of methods, which you will have ample opportunity to try out in practice during the course. You will be asked to plan and manage the practical execution of a workshop for a project team, as well as act as a project participant in a number of other workshops. The majority of your learning will come from the feedback that will be given after each workshop during the course. You will receive personal feedback and plenty of inspiration to help you become stronger in your role as project manager, better at facilitating a good process and better at getting your project team off to a good start.

"It has been inspiring, fun and I got a lot of new perspectives. The topics of this course are enlightening and very useful."

Sofie Wendel, Novozymes

## Target group

You are on your way to becoming a project manager, or you are already a project manager. You may also be an experienced project manager and wish to become even better at what you do.

## Main content

The course covers the following main topics:

- Development of the project team.
- Management styles – Which management styles are the most appropriate in different situations?
- Personal preferences (Whole Brain® – preference model).
- Creative techniques.
- Presentation techniques.
- Staging and design of workshops and meetings, including steering committee meetings.
- Feedback as a management tool.

- Management in practice (your role as project manager of the team, including personal feedback).
- Execution of steering committee meetings and project presentations.

## Takeaways

After the course, you will be able to:

- Form your project team and know how to achieve the best results.
- Utilise the fact that project participants are different individuals.
- Design meetings and workshops.
- Facilitate meetings.
- Manage your team/team members in the best way based on the situation.
- Design/facilitate creative processes.
- Prepare targeted presentations and present these.
- Manage your project owner/steering committee more professionally.
- Give and receive feedback.

## Networking and exchange of experience

The course participants come from different organisations and industries. We do our best to utilise this by incorporating different experiences, viewpoints and nuances into the training sessions. The many practical exercises and discussions are a great opportunity to network.

## Prerequisites

To participate, you must have completed the following module:

- “Project Management 1: Manage your project”

Implement’s Project Management Programme is IPMA®.
