

# PROJECT MANAGEMENT 3

## – SUCCEED WITH YOUR PROJECT

- Projects are always carried out in a dynamic environment.
- As a project manager, you must be able to navigate and manage your project to achieve the desired impact.

The course will strengthen your understanding of the challenges that may arise during a project. You will learn to follow up on your project along the way and how to resolve the conflicts that may arise, to understand and act in the power games that often exist and to negotiate and motivate across different stakeholder perspectives. In continuation of the course, you will get the opportunity to prepare a description of the planned initiatives regarding control and communication for your own project (or project proposal), submit the description and receive feedback.

“Good interaction between theory and practice. Very interesting and relevant.”  
Anne-Mette Gade, Materialecentret

### Target group

You are already a project manager and wish to become even better at navigating your project in a dynamic environment to obtain both organisational and business impact.

### Main content

The course covers the following main topics:

- Behaviour associated with projects and how to handle change processes.
- Project conflicts both upwards, downwards and outwards.
- Leading the project towards impact and value for the organisation.
- Follow-up in terms of progress, risks, economy, quality and impact.
- Active use of the business case.
- Negotiations with key stakeholders.
- Co-creation and implementation strategies.
- Power and influence in the project’s decision processes and implementation phase.

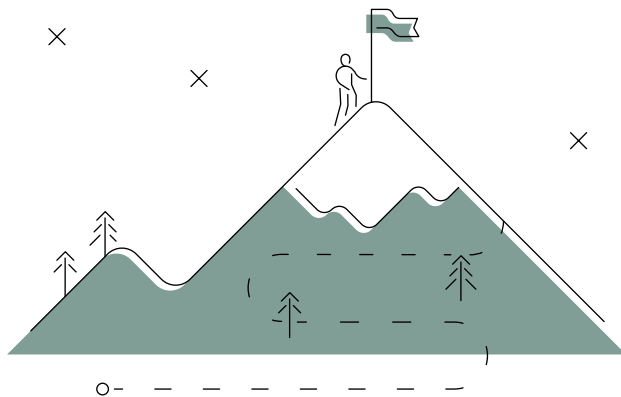

### Takeaways

After the course, you will be able to:

- Create increased motivation for active participation in your project.
- Increase the likelihood that the desired impact will be realised.
- Resolve conflicts in a constructive and proactive manner.
- Succeed better in negotiations.
- Plan and stage targeted follow-up routines in your project.
- Understand power games in and around your project and increase your influence on project decisions and progress.

## Networking and exchange of experience

The course participants come from different organisations and industries. We do our best to utilise this by incorporating different experiences, viewpoints and nuances into the training sessions. The many practical exercises and discussions are a great opportunity to network.

## Prerequisites

To participate, you must have completed the following modules:

- “Project Management 1: Manage your project”
- “Project Management 2: Lead your project team”

Implement’s Project Management Programme is IPMA®.
