

MIRO – ADVANCED VIRTUAL COLLABORATION

Virtual collaboration can be effective and engaging if you have the right competences and tools. Whether you are hosting online meetings, doing virtual workshops or digitising your project practice, this course will equip you to prepare and facilitate effective and engaging virtual collaboration using the Miro platform.

About the course

The Miro collaboration platform consists of a digital whiteboard with many functionalities and integrations that enable effective and engaging collaboration in real time. The course gives you access to a thorough introduction to Miro as well as training in its main functionalities.

The course runs online from 9:00-12:00.

Having a Miro licence is not a prerequisite. You will get access at the course, and you will be able to continue using the platform either for free or with a paid subscription after the course. [See Miro prices here.](#)
